

PIVOTMAX CENTER PIVOT CONTROL PANEL

Tonick Watering has released the PivotMAX, as a basic but reliable pivot control panel to retrofit on to pivot irrigation systems. With the ability to function with any brand or size of electric pivot, the PivotMAX can interface with a wide range of ancillary equipment like pumps, gensets, valves, filters and fertiliser injectors.

SYSTEM ARCHITECTURE

- Operates with a range of power inputs
- Suitable for mains AC powered, AC or DC Generators or Solar DC Powered sites
- The large daylight readable screen, and large direct access buttons, make the PivotMAX easy to use even for those less tech savvy
- Actuate and sense peripheral devices using Wireless IO solutions for remote starts of pumps and other ancillary equipment
- Integrate with any electric pivot

Wireless IO
